

I wanted to comment MB Docket number 04-233. I am opposed to giving priority to Low Power FM stations over FM translator services. My family and I listen to (and financially support) a radio station (K-LOVE) extensively and would be very disappointed if you blocked or disrupted their ability to transmit their signal. This radio station provides wonderful music to us and gives my wife and I a family-friendly place to tune our radios. We know that we will not hear inappropriate comments on this station, unlike most other stations on the air. Disrupting their signal would be a great loss to my family and many of our friends. I have found that K-LOVE provides an encouraging place to tune into.
